

Delivering the Digital Transformation

Cervis – Partner for highly individualized and interdisciplinary rollouts.
Controlling, same day logistics, installation and maintenance from one provider.
Perfectly transparent processes and real-time reporting.

Interdisciplinary Rollouts throughout Germany

With Cervis you implement demanding IT projects throughout Germany. We take responsibility for every step in the workflow – from planning to controlling to logistics for nationwide IT and electrical installations.

Cervis Insight – Perfect Control in Real Time

Cervis Insight, our browser-based workflow management tool, gives you perfect control over every step in the process. From monitoring overall progress to supervising individual steps and tasks – you get all relevant information in real time, so you can monitor compliance and adapt on-site processes as needed.

Same Day Logistics

When critical hardware fails, reaction time is a high priority. We store key components and systems in strategically distributed storage sites all over Germany and we coordinate the technicians who then perform important maintenance at the same day you notify us of the issue.
